AIG1311: Applied Physics Lab, Spring-2026
Assignment No. 2

Instructor: Shariq Khalid

Date: 13/04/2026

Total Marks: 10

Due Date: 13/04/2026

Instructions:

- Late submission is not allowed.
- Assignment should be handwritten.
- Avoid unnecessary details and arguments.

Name: _____ **Reg. No.** _____

Time Period of a Simple Pendulum

Question 1: (12)

Follow the demonstrated procedure and record the observations by copying the method shown in the lab:

- Measure and record time for 20 oscillations
- Repeat the readings for different lengths
- Calculate Time Period (T) and T^2
- Tabulate all readings

Length of Pendulum L_p	Length of String l_s $l_s = l_p - r$	Time for 20 Oscillations	Period T	Period square T^2

Amplitude A	Time for 20 Oscillations	Period T

Question 2:

(8)

Follow the demonstrated steps and sketch the graphs of:

- Period vs Length
- Period Square vs Length
- Period vs Amplitude
